# We Are

Urban Eco Projects A South African waterproofing specialist delivering high-performance Polyurea, Polyurethane, and Spray Foam solutions for residential, commercial, and industrial structures.

We specialise in coatings that don't just protect — they outlast and outperform traditional methods, backed by industry-leading guarantees.

Founded by D'Urban Higgs, Urban Eco Projects was built on a simple but powerful conviction: *waterproofing should be done right, the first time, every time.*

D'Urban brings specialised expertise and a hands-on approach to every project, applying advanced German-engineered sealants — including expanding foams and polyurea — from the foundation to the roof.

*“At Urban Eco Projects, it’s not just about waterproofing — it’s about building relationships that last. We believe waterproofing should be accessible, affordable, and built around people: our customers, our team, and our partners. Whether your project is large or small, we are committed to delivering smart, lasting solutions using the latest methods and fresh thinking. We stand by our principles: doing what is right, treating people with respect, and always aiming for quality and trust.”*

# We Believe

## OUR VISION

To be South Africa's most trusted waterproofing partner — protecting the structures people live and work in, using the best technology available, delivered by people who genuinely care.

## OUR MISSION

To make high-performance waterproofing accessible and affordable for every client — applying smart, lasting solutions with the latest methods, fresh thinking, and an unwavering commitment to quality and trust.

## OUR COMMITMENT TO YOU

- **Superior Quality:** German-imported products with proven, measurable performance across diverse climates and conditions.
- **Guaranteed Protection:** 10-year product guarantee and 2-year workmanship guarantee on every job we complete.
- **Rapid Application:** Minimal downtime for your business or home. Maximum results from the very first application.
- **BEE Certified:** Committed to transformation and excellence in South African construction.
- **Accessible & Affordable:** We believe high-performance waterproofing should be within reach for every client — large project or small.
- **Customer-Focused:** We value honest feedback, because it makes us better. We build relationships that last as long as our coatings.
- **Principled Business:** We do what is right. We treat people with respect. We always aim for quality and trust. That is not a slogan — it is how we operate every day.

**10 Year Product Guarantee**  
**2 Year Workmanship Guarantee**

# Our Products

## **POLYURETHANE**

*Strong. Flexible. Built to last.*

Polyurethane is the smart choice when you need protection that's strong, flexible, and cost-effective. This advanced polymer coating delivers industrial-grade durability with the flexibility to move with your structure. It shrugs off UV rays, resists impacts, bonds to virtually any surface without primers, and requires almost no maintenance once applied. The result: a waterproof, weather-resistant barrier that looks good and performs even better — year after year.

## **SPRAY FOAM**

*Insulate. Waterproof. Strengthen.*

Spray foam is a liquid polyurethane solution that expands on contact to create a seamless, airtight barrier. Applied as a spray, it quickly expands to fill gaps, cracks, and irregular surfaces — forming a protective layer that insulates, waterproofs, and strengthens structures all at once. Triple-action protection in a single application. Seamless coverage that expands to fill every gap and void. Outstanding thermal performance with a superior R-value up to R-7 per inch. Lightweight yet strong — adds structural rigidity without significant weight.

## **POLYUREA**

*When failure isn't an option.*

Polyurea is an ultra-high-performance coating engineered for extreme protection. Formed from the reaction of polyisocyanates and polyamines, it creates a seamless barrier that is virtually indestructible — resisting abrasion, chemicals, oils, acids, UV rays, impacts, and temperatures up to 300°F. What sets it apart is speed and strength. Polyurea cures in seconds, not hours, allowing for rapid application and immediate protection. Once cured, it delivers industrial-grade durability with flexibility to move with your structure.
